## Pre-Approved Roof Shingle Colors Revised March, 2015

The following specific roof shingle brands and colors have been approved for use in the Parkview Heights community. Any of these may be used without submission of a Design Review Request. NO OTHER brands or colors may be used without advance approval of the Design Review Committee. It is strongly recommended that homeowners retain their roofing contract as evidence of what brand and color of shingle is used on their home should it be called into question in the future. With more colors approved, it will become more difficult to discern so it stands to reason that you may be asked about what color was put on your roof if it appears to be outside established boundaries. This will be done simply to maintain standards. Unapproved roof shingles will need to be replaced and brought into compliance at the homeowners expense. All associated legal fees are the responsibility of the homeowner.
